

Rockville Fish & Game Presents:
Surviving Cardiac Emergencies

From Recognition to Definitive Care

Wednesday November 15th, 2017 7:00pm

Seating Limited. Reserve Your Seat: <https://goo.gl/forms/Gele5n1KYgVbDBuv2>

***How is a heart attack different from cardiac arrest? How does CPR work?
What does an AED do? What should I do if I am having chest pain?***

This presentation will answer these questions and several others. If you have an interest in the science between cardiac arrest resuscitation and cardiac emergency care, this is the presentation for you!

This interactive program will introduce you to what happens when a heart isn't beating properly (or at all) and pick apart the links in the cardiac chain of survival, including early recognition, the 911 system, bystander CPR, pre-hospital care and invasive in-hospital procedures. We'll discuss local programs that are improving heart attack and cardiac arrest survival and participants will learn how they can aid in making their communities "Heart Safe".

RF&G member **Joshua Beaulieu** is providing this free presentation for fellow club members. Josh has been a Paramedic for over 20 years and currently serves as the Chief of EMS for Manchester Fire-Rescue-EMS. He also provides training and consulting services for public and private organizations and businesses. He is an expert on prehospital cardiac arrest management and regularly presents on this and other topics for public safety, healthcare and civilian audiences.
